REMARKS

I was having a machine search made on a Soviet Computer Center, Academy of Science, Moscow and the machine kicked out the following report. The analyst discussed it with me and I said that certain people in S had a continuing interest in parapsychology. She followed this up by providing the attached machine run identifying documents of content on parapsychology. I don't know if any are new or if the listing will be of value but some of the articles, especially the one noting military applications, appear to have possible value.
